

EVIDENCE BOUND

AI Legal Research That Cites Its Sources

The Problem

Generic AI tools hallucinate citations, putting attorneys at risk of sanctions and malpractice claims. Litigation requires answers grounded in actual case files with verifiable, court-usable citations.

The Solution

Evidence Bound is a secure document Q&A platform built for litigation. Upload your case files, ask questions in natural language, and get answers with page-level citations you can verify in one click.

Why Evidence Bound

Zero Hallucinations

If evidence is not in your documents, the system refuses to answer. Every citation is machine-verified.

Export with Citations

Export Q&A as PDF or Word with full citations - document, page, excerpt. Ready for court.

Closed Universe RAG

Answers restricted to YOUR case files only. No external data, no cross-contamination.

Matter Isolation

Case A is invisible to Case B. Built-in ethical wall support for conflicts.

OCR for Scanned Docs

Scanned filings, faxes, image PDFs - all searchable and citable like digital files.

Deploy Anywhere

Cloud hosted, your VPC, or air-gapped on-premise. Your data, your infrastructure.

How It Works

- 1. Upload** - PDFs, Word docs, scanned filings. OCR handles everything automatically.
- 2. Ask** - Natural language questions. When was the breach first reported?
- 3. Verify** - Click any citation to see the source with the passage highlighted.
- 4. Export** - Download Q&A with full citations for briefs, memos, or court.

Pricing

| CLOUD STARTER | CLOUD PROFESSIONAL | ENTERPRISE / ON-PREM |
|--------------------|----------------------|---------------------------|
| \$499/month | \$1,499/month | From \$15,000/year |
| 5 seats included | 15 seats included | Unlimited seats |
| 500 queries/month | 2,000 queries/month | Unlimited queries |
| 10 GB storage | 50 GB storage | Custom storage |
| Email support | Priority + Slack | Dedicated + SLA |

Additional seats: \$79/attorney/month

Security and Compliance

Full Audit Trail (every question and document logged) | No Training on Data (your documents never train AI) | Data Export and Deletion (certificate of destruction available) | SOC2 Type II in progress | SSO for Enterprise
